Use Case Scenarios

As IT21826368,

- 1. Section Worked on:
 - Design the use case for the actor "Librarian".
 - Design the use case scenario for "Manage Members".
- 2. Special Contribution:
 - Helped with the use case drawing.
 - Finalizing and compiling the project report.
- 3. Challenge faced:
 - Difficulty in determining user case scenario parts.
 - Choosing suitable scenarios for the actor.

| Number | LMS0 | LMS01 | |
|---|---|--|--|
| Name | Remov | Remove a member. | |
| Summary | Remov | ring a member from database. | |
| Preconditions | Membe | er must be in the database. | |
| Postconditions | Delete | Delete the member details from the database. | |
| Primary Actor(s) | Librari | an | |
| Trigger | Remov | re member. | |
| Main Scenario | Step | Action | |
| | 1. | Login to the system as librarian. | |
| | 2. | Go to the librarian system interface. | |
| | 3. | Select manage members. | |
| | 4. | Go to the member requests for see resignation requests. | |
| | 5. | Select the member. | |
| | 6. Select remove the member option.7. System removes access and cancels the membership card. | | |
| | | | |
| 8. System deletes the member from database. | | System deletes the member from database. | |
| Extension | Step | Branching Action | |
| | 1a. | If the librarian inputs the incorrect id and password, Display "ID or | |
| | | Password is incorrect". | |
| | 5a. | If the member has a fine, the fine must be paid to complete the resignation. | |
| | 5b. | If the member has borrowed a book or books, books must be given back to | |
| | | the library. | |
| | 8a. | If the member details are deleted, Display "Account Details Deleted | |
| | | Successfully". | |

BSc (Hons) in Information Technology

As IT21820946,

- 1. Section Worked on:
 - Designed the use case for the actor "Member".
 - Designed the use case scenario for "Borrow book".
- 2. Special Contribution:
 - Supported to draw the user diagram.
 - Helped to choose the user cases and actors.
- 3. Challenge faced:
 - Identifying unclear paths in use case diagram.
 - Complexity when choosing the scenarios.

| Number | LMS02 | LMS02 | |
|------------------|------------------------------|---|--|
| Name | Borrow | Borrow book. | |
| Summary | Reserve | e and borrow book | |
| Preconditions | Membe | er must be validated. | |
| Postconditions | Add an | d display the book details to members database. | |
| Primary Actor(s) | Membe | er e e e e e e e e e e e e e e e e e e | |
| Trigger | Borrow | books. | |
| Main Scenario | Step | Action | |
| | 1. | Go to the website. | |
| | 2. | Search for the book by typing author, ISBN, book name, etc. | |
| | 3. | Preview the book. | |
| | 4. | Click the "reserve book" option. | |
| | 5. | Login in as a member. | |
| | 6. | The system checks the overdue books. | |
| | 7. | Reserve the book. | |
| | 8. Borrow the reserved book. | | |
| | 9. | Add the borrowed books to the user database. | |
| Extension | Step | Branching Action | |
| | 2a | If the search book is not in the library, display "Book is not found in the | |
| | | library" and ask the user to send an inquiry. | |
| | 5a | If the member enters the incorrect ID or the password, display "Incorrect | |
| | | ID or password". | |
| | 6a | If there are overdue books, display to pay the fine first. | |

BSc (Hons) in Information Technology

As IT21822612,

1. Section Worked on:

- Design the use case for the actor "Assistant librarian" and "Guest".
- Design the use case scenario for "Issuing books".

2. Special Contribution:

- Draw the final use case diagram.
- Giving some ideas to another use case scenarios.

3. Challenge faced:

- Finding correct references.
- Hard to determine the process of a library management system.

| Number | T MCO2 | |
|------------------|-----------------------------------|--|
| | LMS03 | |
| Name | Issuing books. | |
| Summary | Issue the books to member. | |
| Preconditions | Not hav | ing a fine. |
| Postconditions | Issue a b | book to member. |
| Primary Actor(s) | Assistan | nt librarian |
| Trigger | Issue bo | ok. |
| Main Scenario | Step | Action |
| | 1. | Login to the system. |
| | 2. | Go to the manage library. |
| | 3. | Select issue book. |
| | 4. | Enter member id and validate member. |
| | 5. | Enter book id. |
| | 6. | System check the book in the inventory. |
| | 7. | Set book return date. |
| | 8. Submit. | |
| | 9. Add books to member's account. | |
| Extension | Step | Branching Action |
| | 1a | If user enter incorrect username or password, display "Enter correct password". |
| | 4a | Check member id in the database to validate. |
| | 4b | If a member has a fine, member should pay fine before borrowing a book. |
| | 5a | If a member needs another book, system checks membership type, is it "premium member". |
| | 5b | If member is not a premium member, display "not a premium member". |
| | 6a | If book is not in the library, display" book is not available". |

BSc (Hons) in Information Technology

As IT21823220,

- 1. Section Worked on:
 - Design the use case for the actor "Admin".
 - Design the use case scenario for "Add system user".

2. Special Contribution:

- Help to create the use case diagram.
- Implementing new ideas when making use case diagrams and scenarios.

3. Challenge faced:

- Time management Issues when creating use case diagrams.
- Hard to find the right references when creating use cases.

| Number | LMS04 | | |
|------------------|---|---|--|
| Name | Add system user. | | |
| | | · | |
| Summary | | a new user as a system user. | |
| Preconditions | | ee must not be already registered in the system. | |
| Postconditions | | n access to the system. | |
| Primary Actor(s) | Admin | | |
| Trigger | Add ne | w user to system. | |
| Main Scenario | Step | Action | |
| | 1. | Log in as an admin. | |
| | 2. | Go to manage user. | |
| | 3. | Select add new user. | |
| | 4. | Enter user details. | |
| | 5. | System checks the user in the database using user details. | |
| | 6. | Create the username. | |
| | 7. | System checks the username already exists. | |
| | 8. | Create the password and enter again. | |
| | 9. | Assign the roles. | |
| | 10. | Submit data. | |
| | 11. System adds user details to the database. | | |
| | 12. | Send login details to user's email. | |
| Extension | Step | Branching Action | |
| | 1a | If Admin enters wrong username and password, Display "Incorrect Admin | |
| | | ID or Password". | |
| | 7a | If the user is existing, Display "This user is already existing". | |
| | 8a | If the Password doesn't match, Enter again. | |
| | 10a | If details add to the database, Display "System User Added successfully". | |
